i love the caption above it.

Did you know? Thanks to modern technology, you can use computers to
make music! It's true! We've got all the latest music software from

no shit sherlock.

More proprietary Roland crap... sorry, but I have NEVER been a fan of
Roland audio products, too closed architecture for my liking. Just my
humble opinion...

David.

So, speaking as a long term Roland VM-7200 user... :-) "Closed architecture" on a mixer? So, you put audio in, and you get audio out, what do you need to know about the guts of it?

For that matter, the PARIS architecture is too closed for my liking... ;-)

Doug (Doesn't stop me from using it...)
