Is this still available? Interested.... Do you have photos?
Also, is the list of what you have still available in the other thread still a valid list?

Hi,

Thanks for your inquiry.

I don't have any photos but I can send you some. It is new out of the box so it looks exactly like what you'd see at the Magma website. No scratches, dents, etc. Includes the PCI host card and cable (also new). I just took it out of the box, plugged the card into a PC, put an EDS card in the chassis and verified that PARIS could see the card.

The three 8-in cards are now sold. Everything else in the listing is still available.

I have 100% positive feedback on eBay ('mfmcdermott') and everyone who has purchased from me on this site has been very happy with our transactions.

Please let me know if you are interested. If so, send an email to mark@stateofwail.com.

Have a great day!

Mark

Hi,

Buyer of the 8-in cards has determined that his system will only support one additional card without adding a second EDS and MEC so has decided to purchase only one.

So, that leaves two 8-in cards still available for sale at $120.00 USD each.

Please reply to mark@stateofwail.com if interested.

Thanks!

Mark

Hi,

Did not receive your email to me at: mark@stateofwail.com

Magma and 3 EDS cards are still available.

Thanks!

Mark
