great job on getting these cool new effect mike. the new plate is really freeking amazing.

hey so i was messing with this new compresssor.

the mix knob is a GREAT feature. but it doesn't work right. or at least it doesn't work the work I THINK it should... which may not be right.

set it up so you have NO compressrion going on. threshold at 0 and ratio at 1:1.

the volume is the same when mix knob is at 0 and 100.

but when mix knob is anywhere in between the volume is louder. most obvious when the mix knob is at 50... of course.

shouldn't the mix knob be balancing the 2 signals evenly?? so when the mix knob is set to 50... you get the same overall level... but with 50% no effect and 50% effect.

jeremy

Hi Jeremy,

Thanks for posting your observation! I'm just finishing a school semester, but I will look into this as soon as I can.

There does apppear to be a 3dB bump in the middle. Weird.

I just took the blend code from the reverbs and grafted it into the compressor.
 Maybe I introduced a bug.

Cheers!

Mike

Friggin hack!

sheesh!

hehehehe

cool. i understand this is a serious hobby and you have other priorities.
i'm sure everyone loves the work you are doing. certainly no one expects
uad-1 like "support".

you are in school... cool! i thought we were all old-ish dudes here.

:-)

best regards,

jeremy

"all oldish dudes here"... hell if most of us here lived in
afghanistan...we'd be dead of natural causes; me for about 9 years
already. soooooooooooooo mike.....lets get on the stick already.

Hey! Don't leave me out of the "oldish dudes club" I'm teaching the class.
:)

For the next week, I'll be marking full time. After that, it's back to PARIS.

Cheers!

Mike
