Thanks for this X-over crossover eq !!
Really nice.
Can help make a snare and kick sound quickly good !
Can you please implement this on every other plugin ??
Thus we are saving the 16 effects limit per card.
So the compressor could have this before as noLimit and Gate...
Thanks again !
I already contributed for this too so I would love to see others support
you too in the big things you are doing for us !!!
Regards,
Dimitrios

Mike Audet just fixed my system in 30 minutes on the phone. =20
Things I would never have known were quickly walked through=20
and my system is rock solid now. All plugs, presets, errors are fixed.

Saweeeeeeeeeeeet!

Thanks Mike. I will donate once again to your cause just cause.

All should be generous. He is working on all kinds of good things for =
us.

    Really nice.
    Can help make a snare and kick sound quickly good !
    Can you please implement this on every other plugin ??
    Thus we are saving the 16 effects limit per card.
    So the compressor could have this before as noLimit and Gate...
    Thanks again !

No... the Magma/Mec thing is still looming. That correction would =
totally rock
if and when it occurs.

But my new system has no errors and all hardware is functioning as it =

should.
No reloading nuttin'. Moving files around. Adding paths in Windows =
Environment
Variables. Ha! Ever heard of that one? Not me. Changing file names.

I could not have done it without Mike. He knows lots of good stuff =
about Paris. He=20
made it easy for someone who knows close to nothing it's beginning to =
seem.

The new concept on the Mecs is a bad cable or two. I have others that =
are not part
of my original system for testing. I also need to triple check the =
Magma and original
Paris computer.

Hi Dimitrios,

Thanks for the feedback! It's great to hear that you like the plug. It

was a tough one for me, but I also learned a lot because of it.

I'll think about adding the crossover to the compressors, but I'm not sure it would be worth the trade off of using more DSP resources even if you don't need to EQ the signal.

I'm currently working on a stereo version of the stock PARIS eq (4 bands) that would allow for adjusting the parametric width on the master bus. It shouldn't take me too much longer.

All the best!

Mike

Mike,

It is so exciting to see people here working on Paris still. Thanks so much I look forward to helping where I can. I just found and joined this user group today. I will be reading every few days, so anything you need help with let me know and i will help where I can.
