Subject: UAD questions, ohhh here comes the Neve Bus Comp.

Can anyone tell me if there are any issues with the latest UAD version and
Paris, I'd like to download it to try out the Neve EQ on a mix I am about
to do.
My system is stable, (knock on wood) so I am alway wary downloading anything.

Also DJ, you said the Neve was the holy grail, after a month or so with it
do you still feel the same, can you get close with the paris EQ?

I have been sort of on a hardware only kick lately, as I can't tell what
platform I'll be on in a year, but if the Neve is that good I may just have
to buy one of these Flex Packs from Morgan.

Oh , has anyone figured out VST on the drum bus?

If you are running Paris on Win 9x, it will not work. V3.9 is the last
version that will work. Otherwise, I don't know, but *theoretically* it
should work on XP. As usual, Ghost your system first.

Yeah, I'm loving it.

> do you still feel the same, can you get close with the paris EQ?

Interesting question. The paris EQ makeup gain has some similarities to the
Neve 1073 gain , though the Neve is smooth whereas the Paris is *gnarlier,
IMO *. The thing I like about the 1073 is that it's the only digital EQ I've
used that I consider to sound good when *boosting* frequencies.The Paris EQ
doesn't sound *bad*, to my ears when boosting, but it doesn't really add
something that sounds *better* either.

> Oh , has anyone figured out VST on the drum bus?

Yes.....but it involves two computers performing unnatural acts.

;o)
