Subject: Using Paris hardware with native DAWs?

I thought I saw a post a while back about using the Paris Hardware with other DAWs, but I searched and couldn't find anything.

Is this possible?

Are there any instructions on how to do this?

Thanks,
Mike

There was an ASIO driver once upon a time. Never did work well beyond a stereo pair of I/O and latency was high in Wavelab

My instructions would be to forget about the idea altogether and buy a Lynx or RME card if you want to use a different audio app. It will save you time and grief.

;o)
