eet..

Everyone who's played there since I hung those has loved 'em.

Just random thoughts.

I only started watching because I had seen Ty Taylor in "We Will Rock
You" in Vegas.

I was never an INXS fan.

pab"Boxen"

Thanks Paul; this has got to be one of the best malapropisms I've seen in a
while.

pads: I recently tried to remove an Athlon 64 chip
that had been installed a day earlier with the supplied pad and couldn't get
the heat sink off. I pulled with force until the chip came out of the
socket with the pins locked down. That would never happen with grease.

It was his k-67-alike (I think his model # is ck-67), and yes,
i did it myself - it's easy as long as you're careful. You're
just using one side of the capsule is all, since the m-147 is a
cardioid-only, and the -67 is a dual-sided capsule.

> What kind of improvement did you see?

>Got an M147 waiting to be ripped apart:)

HUGE improvement... that mic was pretty dark & inarticulate
before, with this capsule it's like a whole 'nother mic
altogether. Just make sure you get the mounting pin/bracket
from Peluso, too - the screw holes in the one in the -147
don't line up right with the Peluso capsule.

Neill know at least one of you has the facilites & capability to do
short-run CD's... here's what I'm looking for:

A gal I know has a voice stu

> Anyone else notice that the graphical interface of the EQ is somewhat misleading.

For instance the highpass seems to leave a bunch of low stuff in here..but
the graphic looks like it is cutting everything.

Are there any more "accurate" eq's out there..Say I want to cut everything
under 90hz..it could make a hard cut t
