Just wondering if anybody had any thoughts on Stewart power amps, I'm looking at a Stewart PA-50B. I'm thinking about using it to power some small reference speakers.

Haven't seen one in many years... that's because most of them around here are already at the land-fill! Horribly unreliable, but OK sounding... nothing stellar to be sure. Vaguely reminiscent of the little Yamaha '100 that was out years ago.

David.
