in like 18 bazillion years.

i faintly remember there was a special order you had to do it in. ??

install software first...

then drivers....

then put in the cards... 1 at a time?

then determine which one PARIS is calling the master card.... and connect
that card to master mec.

i am doing this on XP. i realize i need to install the effects subsystem.
i have those directions... i just need a quick refresher on the 98se
install.... so i have my bearings for an XP install.

does anyone mind?

jeremy

p.s. can you believe someone so technically challenged actually has a mix
thats #12 on the A/C chart... "change"... kimberley locke.

;-)

oh sorry...

the instructions are in the xp drivers zip file.

there is a readme.txt in there.

perpetually goofing off,
jeremy

error 18/12???

connected harware. installed new drivers. installed new pace drivers.
installed paris software. installed effects subsytem. in that order.

XP finds 3 ENSONIQ Scherzo devices under System Devices.

paris.exe is in Program Files\E-MU\Paris Pro.

that's where the subsystem went.

any ideas?

jeremy

asus a7n8x-e
xp2800
FX5200 graphics
XP pro SP1
1.5 gigs ram
3 cards... 2 mecs... 1 c-16

cables are attached correctly.

just trying 1 mec now.

ok found master card.

paris is launching.

attaching 2nd mec now.

how do i get the NoLimit plugin that i purchased?

i thinks its on my old 98se drive which is kaput.

i don't recall there being any registering.... just buy it.... get it in
email.... install.

maybe its on a backup drive i have.

the babbling goof roles on.... stay tuned.

ha.

DJ does this much better... only he doesn't babble and he actually knows
what he is doing.

attach 2nd MEC to either card.... error 18/12.

is this a clocking thing?

i have 2 adat modules in the 2nd mec.

tried every config of bnc from mec1 to mec2... as far as termination.

the correct way is.... WClock out mec1 into mec2.... terminate mec2 out.

right?

what is 18/12 anyone know?

i've had to much coffee.

tried each mec seperately.... (as a 3 card 1 mec system)... works like a
champ.

connect both mecs.... no go.

removed waves plug-ins. no go.

paris launches with 1 mec attached... either one. no go with both.

18/12 is an ADAT error in XP. Only one ADAT module will
work.....sometimes.....

That should read, "when using windows XP, only one ADAT module *per MEC* is
usually the rule.

thanks DJ.

back to 98se i guess.

did you get my email about that board you sent me? i sent the email last
week i think.

best,

jeremy
