
Subject: Anyone using the Sytek MPX-4A Pre?
Posted by [Rob Arsenault](#) on Wed, 19 Sep 2007 16:53:33 GMT
[View Forum Message](#) <> [Reply to Message](#)

Have you noticed any phase reversal issues relative to other pres?

Mine is 180 out, check and re-checked all cabling, good. Malted a sine wave to all my pres, all others coincide, Sytek (all channels) inverted.

Or am I suppose to flip my computer screen around.....duh....!!!!

Rob

I never checked mine. Now you have me wondering. I'll try multing an RE-20 to the Sytek and another pre and I'll let you know what happens.

Meanwhile, contact Mike at Sytek:

<http://www.sytek-audio-systems.com/>

No, these preamps were designed specifically for the bottom-mic'ing of snare drums, and the back of guitar amp cabs - didn't you know that? :)

Neil

Check for internal polarity jumpers. If this was purchased second hand, someone may have inverted the polarity.

David.

Thanks Gantt, please do check yours to see and yes, I have sent an email off to Sytek and await a response.

Hey Rob,

I multed a RE20 to my Demeter VTMP-2a, my RNP, my Presonus M80 and my Mackie

1402 along with the Sytek. The Sytek is out of phase w/ the VTMP-2a but IN phase with everything else.

Most interesting. Now I have to call Demeter to find out what's up w/ that!

Yea, that is kinda strange. Please let me know what you find out. As for me, I will be running the Sytek with all channels inverted for the time being, I tested this and all seems fine in relation to the other pres. It still bugs me thow and I cant wait to see what the boys at Sytek will have to say about this. Stay tuned.

Geez, now I have to go run a sine wave through every channel of all my mic pres just to check & see if i've got this same situation with any piece of gear.

I think if did, I would've heard it by now on SOMETHING...
.....but, SEE WHAT YOU'VE STARTED???!!!!???

lol
