Last week we were starting to feel like spring, getting some
temperatures up into the 80's - which is one of the things I
love about living in the desert this time of year - then
yesterday afternoon it starts getting cold, gloomy, wind starts
blowing, etc... the wind blew incredibly hard all night long,
the city trash & recycling containers that are said to be
tested for 50-mile gusts are no longer up against the side of
my house, they're laying out by the street. We get strong winds
in my area a lot, because we're pretty close to the mountain,
and the wind just screams down that thing... when that happens
I often end up with a bunch of leaves & junk in my pool - no
big deal usually, as I have an automatic vacuum, so that takes
care of most of it within a day or so, and if it's swimming
weather I can always just switch to the manual vac & help it
out if needed. So this morning I wake up & it's still kinda
crappy outside, and so I go out back to see what kind of
leaves, plastic bags, squirrels, etc have ended up in my pool,
and I find this (see pic). It's a friggin newspaper! Looks like
a whole damn newspaper, in fact, not just a section of it! How
the hell am I gonna get that sucker out of there? I ain't goin'
in after it, that's for sure - the thermometer out back says 39
degrees right now, so I can only imagine what the water
temperature must be! lol
I don't even know if I'll be able to grab that stuff with the
skimmer net, because that's ten feet down and I can't get any
leverage with the pole extended that far, and that waterlogged
newsprint is gonna be pretty heavy, I imagine!

ARRRGH!

This is why there is so much disinformation about the sacrificing of
children in the cenotes of the Yucatan. It wasn't about sacrificing the
kids, it was because the damn windstorms blew the Daily Stone Tablet Herald
into the pool and *someone* had to go get it. This is a job for Neil Jr., or
if no Neil Jr. is available, grab one of the neighbors kids. What doesn't
kill him makes him stronger and kids can usually be talked into going
swimming for just about any reason..

;o)

OK, I got it out of there - it took about a half an hour and
yes, it was a beeyatch.

Thought the extension on the skimmer pole was gonna break a
couple of times. Had to use the net like a spatula to scrape
the paper off the bottom, then twist it around to snag pieces
of it as the paper floated up a bit.

My hands are almost thawed now (39-degree water dripping off a
metal pole is not a good feeling lol!).

Fun. Last year we had such crappy wet weather during the summer
I was only able to use the pool about half the time I was the
year before... if that happens again, I may just fill it in &
build a drum room out there.

Neil

Now your hands know what it feels like to make an ice rink in the middle of
your back yard in the dead cold of January

Welcome to my world.

Hell I'd be happy if I could see the bottom of my pool...I still have a two
inch layer of ice in the damn thing

heehehehehehe

Wait a year or two and global warming will make it much more bearable
(ducking)

Hey if Global Warming means I don't have to live through 30 days in a row
of -30 C temperature it can't be all bad

(ducking behind Aaron)
