 it, the
Lexicon PCM 90 has two processors that run parallel or in series. I use the
processors in parallel, routing one of them via spdif coax and the other
either via spdif optical or analog. They have the Lexicon PCM 90 presets
loaded, with the exception of the plates. This thing sounds *very* good.
I've got other Lexi boxes here so it doesn't get used as often as it used
to.

http://www.lexiconpro.com/studio/index.asp

The other hardware DSP processor is a Power technology DSP/FX ISA card. Here
is some info on it.
http://www.dspfx.com/eqmag.html
This one has the AES daughterboard.

Both of these cards are running fine in my original Paris computer running

Win 95 (the only OS the drivers were developed for). It is based on an ASUS P2BLS mobo. It has a pair of CDR drives and a 2G Seagate Barracuda HD that is
