Subject: Again Paris latency Posted by zmora on Fri, 26 Oct 2007 00:48:33 GMT View Forum Message <> Reply to Message

I reconised interesting thing. When I send signal to aux fx, (for example Chorus, Comp, Pseudo Stereo) by Out wire plugin, sound is very good, less ruin, less phase. Scenario: on insert Out wire, on aux In wire and some FX. Also reverbs sounds more nice!!! No sapleslide etc.

Try it your self.
