Hey you guys that use the UAD plugs in Paris. Are you tired of not having enough headroom? Put the Paris native eq AFTER the UAD plug. The ugly KAK! goed away and you can still push the plug to get some mojo out of it. Don't turn anything down on the Paris plug, just have it sitting there. You can also place it before the plug, but then you'll have to turn it down to lower the input to the plug. If you place it after, it just acts like a big ole sonic shock absorber.
