Non broadcast, non interleaved .wav's can be imported... or PAF/WAV
Convert can be used on the files.

David.

Say someone has some tracks in cubase and wants to mix them in
Paris (in a different city). Is there an audio file format Cubase can
output that Paris will open?

thanks!

24 bit .wav will work. Tey will be converted to.paf when imported to Paris,
thus creating a second data file. Don will end up with the original .wav
files, plus the new .paf's. He can then remove the original .wav files from
the hard drive if desired.

I believe 16-bit .wav's @ 44.1k or 48k are the only options for that conversion, aren't they?

Thanks everybody.

Is wav the default file format in Cubase?

Yeppers, but you can set it (at least SX, dunno about earlier versions) to default to regular .wav or b'cast wav, either one.

Now, if he's got it set up as b'cast wav, he can export as regular wav, since that's what you'd need, if he's going to render out each of those tracks separately (or as non-interleaved l/r files).

Don, is he not sure what to do or how to do it? If not, I'll be happy to do it for you - he'd just have to send me the project files & audio folders & files on a CD-R. Lemme know if I can help... be glad to, if needed.

THAT's cool! so they auto-convert when imported? I didn't know that.

Thanks Neil.

I will be seeing him on Monday and will chat about it with him. Hopefully, he can output the files in standard wav format and bring them over to my room. If not, we may need some help.

Another option if you have WL4+ is to batch convert them.

David.

Hey Dave -- just curious, is WL4 (or 5 and now 6 for that matter)
still able to handle paf's?

I was buying the upgrade to 5 when the NAMM show came along and they released 6... Now waiting on that one to show up... Time to get a life I guess...

chas.

That is a very good question, 4 definitely... 6, I don't know. I tried asking that very question at NAMM, but the product specialist was too busy showing "yellow badged beer toters" how to make MP3 files for their iPods...

David.

Hi Chas,
You should ask this on the Steinberg wave lab forums.
The actually developer of the program responds to questions. There are
threads there already about the new features so it would be best to post
in one of those.
