I can do this for you - please email me @  
morganp@ntplx.net

Warmest Regards,

Morgan :)

> DimitriosHi,

If you already have two pulsar cards (for the shake of more dsps) and you don't care much about the many adat ports (why not ?) then I trade my pulsar Scope Pro card which has 14 dsps all on one card and you can transfer your plugins (paying a fee to creamware for the transferring) to the Pro card (has no plugins !!).

If you leave me some basic plugins on the pulsars ( the ones you have double because of the two you might have) then I can throw in the trade an AKG C562BL microphone around 650\$ new in grat condition !!

So why you wann do that ?

First you get two more dsps all on same card which does not need to share among two cards your project you will get SDK the plugin BUILDER !! the one with which I made my tube/tape emulator and which comes free from Creamware ONLY if you have a PRO card and not even if you have 100 Pulsar II cards...

You get the free microphone ! and you pay the transfer fee for your plugins to creamware for transferring them to my (your) Pro card.

Why I do that ?

I need more ADATTTTTSSS ins and outs!!!!

I will be building the 4 card (seldom even tried by anyone) on same computer...

Let me know if anyone has the two Pulsar II and wanna do this...

regards,

DimitriosDimi, I have ONE Scope Prject Card (6 DSP SHARC chips) that I would consider tradng with you for something (or selling for cash). Do you have anything else to trade besides the Scope stuff at this time?

I also have a Sync Plate, which I think you'd need if you're going with more than one card - if I'm not mistaken.

Neil

And you are all together

koo koo kuh choo

pabHey Deej.

Do you still have the NT5's?  
I may be interested, depending on shipping costs to Oz.

Many regards
