Sadly - I am cleaning out my basement studio for a friend to stay in. Yep, he is a getting a true "studio apartment" This means the PARIS system is losing its storage area, though.

Ideally if anyone in the Denver area is interested in it, it is available for pick up, just PM me at the email below.

I'm also willing to ship the system out for the cost of shipping (continental US only).

I'm not sure what I/O cards I still have at the moment. When I get home I'll update the post with further details. For sure I have two EDS-1000 cards, the MEC and CS16.

Feel free to contact me: rohdeww at gmail dot com.

Thanks!

-Rohde

Hi There. I know you don't want to ship outside the US, but I think one of my EDS's is going south. Would you at least consider shipping to Adelaide, Australia? Not urgent yet, but I would pay US\$150 for the two EDS's including shipping. Cheers. Kim W.
