Hi Mates!

I own a PARIS System III & a Mac G4 DUAL 1.25Ghz MDD (Model: M8570) Machine.

My G4 only has 4 PCI Slots but the throughput is the best made on a G4.

I was considering putting my PARIS EDS-1000x Cards & RME-Audio HDSP 9652 Soundcard into an External PCI Expansion Chassis.

I was looking on eBay & found 2 basic types.

The Magma & The Avid.

I was wondering if you knew of the differences or what I should be considering.

I know that the PARIS Cards are the Slower 32Bit with slower Bit Depth & Mhz than the G4 itself.

I was wondering if you would recommend one over the other or what factors to consider?

I wish to leave the remaining 3 PCI open in my G4 for Faster Cards.

What do you reckon - What would you guys recommend?
