Hi,

i have problem while i'm trying to start Paris.

During the opening, when Paris engine initializing VST effect i got "error in initializing Paris Engine.An unexpected engine error occured" and only i can do is press OK, then nothing happens...

hope anyone can help....

Hmm, Mac or PC? Could a bad VST plugin be causing the problem?

Test by eliminating your VST plugins. PARIS can be pretty persistent in remembering the VST plugin folder, so make a new folder on your desktop, drag all the plugins from your VST Plugins folder into it, and see if the problem persists.

By the way - if you have a chance to post the exact error code, once we've solved it I'll add it to the wiki so we've got a documented solution if others run into the same error.

Have you removed the VST folder pointer from the config file?

You'll find some useful info on your config file at this link at the Wiki.
