Strange. I decided to restore my Paris computer since I was getting many lockups along with weird happenings while using my studio. I started from scratch (windows 2000) and got everything installed and up and running. However, I didn't adjust the system.ini or the paris.cfg yet, but started using the system with current projects. All was fine except; when I completed recording a track, I immediately hit rewind. I sometimes get a alloc error if I hit the rewind too fast [must hit stop, wait a few, then rewind]. So I change the system.ini to reflect:

```
[VCache]
```

```
MinFileCache=51200
```

```
MaxFileCache=56320
```

and I changed the paris.cfg to reflect the i/o size to 256. I reboot and now when I close Paris, it locks up, forcing me to turn off the computer manually. Anyone had this same problem? I am gonna go back to the old settings in the system.ini and try that, but was wondering if those numbers are too high. Btw, this is the first I restored my Paris system for quite a few years. I am getting tired of these sporadic lock ups or alloc errors and I was hoping to find the culprit. I am on a dual Pent III (1 Gig), Win2000 and one EDS only, 768 RAM, lots of harddrive space.

Also, I have b
