My friends son got the LE version of Cubase bundled with a Yamaha keyboard he bought. He says it only deals with midi. I have zero knowledge of Cubase, but told him I am sure if he got the full version, he would be able to record audio tracks with it. Was I right? What can you guys tell me? Can he do lite pipe or digi I/O to record in Cubase? Costs?

All he wants to do is lay down a few live tracks with his Yamaha S-90 ES.
I would have thought that's what this bundle was bundled for!

Cubase LE can record audio just fine... up to 8 tracks at one time
(given proper hardware).
