Subject: 3 EDS Cards 3 MECs -48 Simultanious Recording Tracks? Posted by Stevehwan on Sat, 22 Mar 2008 15:47:02 GMT View Forum Message <> Reply to Message

Assuming I have 2-8 channel input cards in each MEC, is this a logical thing to attempt?

Steve, yes you can do it. For 3 mecs you will need an external word clock.

As soon as you add a 3rd MEC you will *HAVE TO* use an external word clock with seperate cables to each MEC, and add the "house sync" line in the config file.... but yes, it will work fine.

David.
