OK, so I've figured out that I can use my Dell keyboard on a Mac G4 Dual system....
what I can't figure out is what keystrokes to get the CD tray to eject, LOL...

so Mac gurus.. how's that happen w/o the eject key (non-Mac keyboard)? using
a mac keyboard isn't really optional as I need, for space reasons, to use
a KVM and only one keyboard and mouse. This model Mac has no eject on the
computer itself.
