I just installed Paris on XP and if I bott the comp frsh and run Paris I can
work on that song with no problems, however when I exit that song the next
song loads but won't play. I have to reboot the comp and then Paris to start
the next song. Also, if I try to load any previously recorded song that have
native plugins running it either locks or will play that song, but won't
load another. I am completely stumped, I need help!

Thanks,
Mike
