I'm thinking that it's getting to be time to replace my trusty old Fostex T-20s w/ new and better sounding headphones. The great thing about the T-20s is that they seem to be almost indestructable. I've had to replace the occasional cable and other bits and pieces, but I've never blown a pair, and God knows, I've tried!

So what do you guys use? I need phones that can get LOUD without crapping out. I run them w/ a Bryston 3B into custom made breakout boxes. I have a pair of Sony 7506s that I sometimes use for cue mix, but I'm afraid they can't take the abuse that the Fostex 'phones can handle.

Thanks!

Gantt

Gantt; try the Sony MDR-V600's - you can find them at places like Circuit City & Best Buy... very good sound quality, no perceptible leakage, and really decent volume levels. About \$99 retail, IIRC.

Hi Gantt

I used to use the T-20's in my old studio, but when I started to do location TV audio, I bought the V6 /7506's, and I swear that you can't kill them with an axe.

I've had 2 pair in the 21 years that I've been doing location sound, (all around the globe), and they've taken everything I can dish out to them, and they're good sounding 'phones.

BTW, they're pretty much the location recording standard these days.

I hate the 7506's hyped low end and brittle high end... we have 5 dead

ones in a box around here somewhere... blown elements. But I know many people that swear by them.

If you like the Fostex, check out the T40. Also for \*loud\*, try to find a used pair of AKG 270's... the dual element ones. You could almost use these things for nearfields! :-)

David.

Gantt,

I have 7 pair of AKG K240s and only once took a driver out thanks to a 1k sign wave at ludicrous speed. I don't love their boxy/cloudy sound but they do take a beating. Shattering RnR levels from a 175 watt amp.

20 years and counting.

Tom

The Sony v900's are nice too. That's what the talent uses here when tracking. I still use AKG 240's in the control room though.

Man! You guys are nice to your talent! My T-20s are \$80 apiece... less on sale. If I'm going to begin replacing my 6 pairs of them I need to stay in the \$100 or less range.

By the way - I use Sennheiser 580s in the control room. I read the thread about Grado RS-1s with gear lust in my heart. What do the rest of us use?

Looks like they street at around \$100. I might have to buy a pair to try.

Yeah, they're around 100 clams. I got mine from Corner Music in Nashville.  
Talk to Ray or Joel.
