The compressor / limiter sounds immediately better than the cubase one to me and is very smooth. There is noise while adjusting settings like most plugs but the sounds is nice and smooth.

For free all I can say is wow. I just went through most of the plugs and they are really very nice. Spacer is a super smooth reverb and the exciter is great on vocals.

I'm not impressed with the limiter though. And other effects like Monster are hard to figure out without a manual. It helps to know what they are emulating and then go lookup the manual online if possible.
