Hi,  
If I'm to use a 442 and an MEC on a 2 eds card rig, do I need to connect the BNC cables. I seem to remember something about needing an independent worldclock source when there are more than 3 interfaces, but was unsure for two cards.

Thanks,  
Dan

Take a word clock cable from your interface 'A' to interface 'B'. If you add a 3rd interface, then you'll need external house clock. Two is fine, been that way for years here.
