First SongSmith, now this..

<http://www.audiomidiblog.com/?p=740>

At least it won't catch fire..

Cheers,

TC

Lives on a dongle, 'eh?
Reaper already does that :)

DeeJ will load that onto his PC, and watch - it'll be the first

case in recorded history of a software app causing a computer

to burst into flames.

;)

It's old news. I bought an earlier version a couple of years ago since it's Norwegian and not Behringer's, in other ways than Behringer is buying up good software from small firms, as bigger firms allways does. A good safety that it won't burn your pocket or 'puter in any ways;-)
I don't remember at all what it looks like and how it was doing.
