I use Paris Pro. I have got a problem with Loop a part between marker 1 and 2. If i press the loop button on CS16 nothing happens.

I really don't now the way to make a running Loop of a part. Someone can help me ?

THX for Help !

are you trying to play back the loop area repeated or create a loop that you can copy?

are you setting proper loop markers as opposed to punch markers

if my memory serves me correctly....

locate start point on grid, press loop start on C16 or right click

locate end point on grid, press loop end on the C16 or right click

press loop, then play
