Hi all. What a great place to visit after a long day of recording. Still running a Mac. Feel bad I can't check out Mikes cool stuff. Thinking about the jump to PC. Also looking at Radar. A small version of it. Southern Utah can't afford the rate that I would have to charge to justify a full blown version. Really interested in a Benchmark DAC after reading Wayne's remarks. Anyone traveling to Zion National Park PM me and stop by for a visit. Just 25 minutes away from the park. Love to chat with any of you Paris users in person. Still using it every day, and my Studio is ALWAYS booked a few weeks in advance. What a blessing. Still going strong in a Pro Tools world. Love it.
