My PARIS will not launch...I have not launched it in 10 days or so,but nothing was changed.The error message is : "Error in initializing Paris Engine. There are not enough resources available". I have never seen this one before,and there are no background programs running. Anybody seen this message? thanks

To continue this..it seems to have something to do with plug-ins and the FXpansion VST converter.It usually shows the VST box,right before booting,but now when it gets to that point the error message happens..I tried resetting it,but no luck..
