I am currently running Paris 2.2 but I need to put Paris 3 on. Call me lazy but I just never got around to it, but another paris user that I want to send some tracks to needs me to save my track files and he says I can do each track as a file so he can line it up in his machine.

Can I install Paris 3 without removing Paris 2.2. I do not have any of my original disks so I don't want to lose 2.2, Just in case Paris 3 doesn't work right.

I am open for suggestions...

Thanks,
John Cookman

If I remember correctly you can install 3.0 along with 2.2 but I'd wait until you get further confirmation before doing that.

In the event you do lose it I believe I have 2.2 on CD lying around just in case (I'll check) but trust me once you play around with 3.0 you won't be going back.

The other thing is unless you are getting these tracks back from your friend (with 3.0) you do not need to move up to 3.0 as it will read 2.2 files.

I'm running version 2.2 alongside 3.0 with no issues at all. You don't need to remove 2.2 to install 3.0.

I hope this helps.

All the best,

Mike
