Subject: XP x86 Launch Problem
Posted by Exhale on Mon, 29 Apr 2013 07:22:53 GMT

Hello.

Could you help me ?

I just bought and downloaded latest ensoniq.ca drivers.
Installed version 2 + drivers and got
"Error in initializing paris engine. Error code 1/1"
The EDS card is "uknown multimedia device" in the device manager, is it how it should be ?
I tried to locate the drivers manually but with no success.
I thought that this new driver is simply a wizard and should install everything automatically, am I
wrong ?

What can I do to solve this ?

Regards...
