Subject: OT - Can someone tell me the history of the 500-series modules?
Posted by pbraun on Mon, 07 Sep 2009 16:22:18 GMT

I keep seeing modules for the 500-series racks and lunchboxes. I've been curious -- was this just a modular thing that API came up with, or did these start out as modules in a vintage API console that someone decided would make great outboard gear?

I've tried googling and can't come up with an answer.
