I had a tune almost finished. All Automation almost done. I wanted to automate
2 effects sends and the automation woud not work after I made the adjustments.
 Then to my horror, all the other automation to the tracks would not work
either. I tried everything. Nothing works, it's like the file got a bug
and it will not see any automation information. Can anyone help?

Mike

Michael - post this in the main group, IDEA.EMUEnsoniqPARIS - you'll get
much faster attention in there.
