Hi all. You'll find a ppj with a few presets for Mike Audet's "Class A" amp plugin at the Wiki.

<http://www.kerrygalloway.com/WikiPARIS/wikka.php?wakka=Class A>

I really haven't had time to buckle down and do any serious tweaking or playing through it, I hope to do more solid preset-building in the new year in collaboration with some "real" guitarists I know. For these I simply ran some old electric guitar tracks (played by much better guitarists than myself) from old sessions through it and tweaked until I got settings that fit the track.

But it's a starting point, and maybe it will inspire some others to haul out Class A and show us what can be done with it. Anyway, more coming; have fun!

- Kerry

Huh, I just had a great talk with Mike about the gain structure on Class A and I think I have a better handle on what's going on in the ahem *twelve* internal locations you can apply gain in that plug :D So don't expect too much from these presets; next batch I'll be applying the "lessons learned".
