, with multiple sliders), and I don't know what else.

I also accept actual money. I'm not sure what I'd accept for these, but I'd like to get them on their way to greener pastures.

Thanks,

StefanHi,

I have a RME 9636/52 with 3 adat ins/outs and wordclock in/out (one pci card and one addon card)

Regards,

Dimitrios

00

1 Black C-16 \$100 excellent condition
1 Black C-16 \$75 some scratches but fully functional
2 EDS cards \$225 each
3.0 License \$125 but I don't know how to transfer it :)

Buyer pays shipping. Payment through PayPal. Possible discount if purchasing several items.

ThanksMy MEC buyer fell through on sending payment, so here it is again with a major price drop. This black MEC in excellent condition can be yours for a mere \$85!!

Buyer pays shipping (it is well packed and ready to ship), Paypal payment preferred.

Thanks,

Steve Helm
shelm@radford.eduYup, thats exactly what I did! Works just fine!

Cheers,

Kris

250\$ shipped anywhere.

Great working condition ,almost has never been used.

Paypal.

REgards,

Dimitrios This card syncs to paris in XP ok, right? I've been thinking about moving my
UAD out of the box and into a native machine and going full on nuttin but
paris in the other box.

You see any pitfalls in that scenario?

I choose Polesoft Lockspam to fight spam, and you?
<http://www.polesoft.com/refer.html> Hey Kriss and DJ,
you are right we didn't think about that !!

I have already several 110V machinery here with small 110/220V adapter trannys.
They are cheap.
R880 is 58W machine so no problem using one that is sold for irons and similar stuff.
DJ ,same applies for the M5 !!
I think these use outboard power supply which must be 110V, right ?
Regards,
Dimitrios

>Exactly,
I work this way already as DJ and others do.
One daw only with Paris and another (maybe more too) using either UAD1 or
DX/VSTI's or other dsp cards like Pulsars.
I clock a Core 32 on a separate machine from Paris Adat sync out totally
reliable.
Regards,
Dimitrios

Sounds interesting. Can you point me to somewhere where I can find more info
on the product (this lets you use PCI cards - including the EDS card - with
a laptop and desktop, right?).

I'm in Europe (London, UK).
Drop me a line (delete the NOSPAM bit).

Best wishes,
Dan
