Subject: How many 8in cards can I use at one time in 1 MEC?

Hey Folks,

To simplify my control room routing I'd like to have 24 inputs plugged into my mec. Understanding that I can only record 16 tracks at once, I'm wondering if I could record from (3) 8in cards at once, but only using 16 ch?

I have a spare MEC and 442, just trying to keep the interfacing simple.

Thanks for any info / feedback.

Lance
