Hey,
I'm interested in the A8oT if it is still available.

Dempsey

First of all, thanks to everyone who has called or e-mailed and =
requested an item. I am in the process of breaking everythng down and =
packaging it. It's a big task so please bear with me. I will be =
contacting you when it's ready.

Here's what's left:

3 x MECS - \$100.00 each
1 x MEC-IF2 port not working - \$75.00
1 x EDS 1000 with interconnect cables \$200.00=20

1 x EDS 1000 \$175.00=20

3 x C-16's \$60.00 each

5 x ADAT modules - \$200.00 each

1 x A8oT-\$200.00

3 x IF2 modules - \$25.00 each

3 x 15' long SCSI cables -\$25.00 each

Brian T. DVD \$20.00

1 x Scope Home card 3 DSP's (2 x ZLink ports, stereo spdif, stereo =
pair unbalanced I/O, 16 channels ADAT I/O, 16 channels midi- =
in/out/thru)=20

bundled with the Amp sim plugin - \$275.00

1 x Scope sync plate \$125.00

7 slot Magma chassis with host cards and 80 pin ribbon cable -\$300.00=20

13 slot Magma chassis with 80 pin ribbon cable and host cards \$400.00=20

2 x MAudio Digipatch units- \$250.00 each

Sony MU-R201 stereo reverb - \$225.00

<http://cgi.ebay.com/ws/eBayISAPI.dll?ViewItem&item=280076839609>

<http://cgi.ebay.com/ws/eBayISAPI.dll?ViewItem&ssPageName=ADME:L:LCA:US:31&item=280076836376>I'm in a frenzy of boxing up all this stuff. Trying to figure out a way to provide something of value for a good price. Here's what I've come up with.

1 x Mec, 1 x IF2 (gives you a total of 8 x ins and 8 x outs if you include the coax port) plus SCSI cable and a C-16 for just \$150.00

I've got 3 x of these bundles. Get 'em before they hit EBay.

all of the 24 bit input and output modules are gone.

5 X ADAT modules remaining \$200.00 each.....you guys need these if you're going to use farm systems streaming audio into Paris. My ADAT modules are studio veterans and know the drill. Don't take a chance on being embarrassed in the middle of a session when some amateur ADAT module clams a take.

only 1 x EDS card left.....

2 x of the 15' SCSI cables left. these things are great to put sojme distance between your computer and MEC if noise is an issue.

;o)

Deej

animix at animas dot net

970-375-7081Ok, I'm seriously considering selling my Paris gear. It's in absolute mint condition, having only been used in a personal home studio (music is my expensive hobby).

1 x MEC
1 x C16
2 x EDS1000
1 x 8in

If can get not much for it then it may be worth keeping just in case i ever want to revisit my projects, but if i can get a reasonable amount I'm out. Make an offer Aussies!

please email me directly as I don't have time to read the newsgroups anymore...
petealec@bigpond.net.au I'm located on the Gold Coast.

Thanks,
PeteUpdate:

5 x ADAT modules (4 x blackface, 1 x blueface)-\$200.00 each

1 x bundle consisting of MEC, C-16, IF2 and SCSI cable-\$150.00. Has all front and back plates.

1 x bundle consisting of MEC, C-16, IF2 and SCSI cable-\$125.00. The MEC has the rivets missing on the bottom of the chassis so the bottom plate is attached with black gaffer's tape. Has all front and back plates.

1 x MEC missing a number of front and back plates-Everything works fine except the IF2 port-\$50.00

2 x Midiman Digipatch units - \$250.00 each

1 x Sony MU-R201 stereo Reverb - \$200.00

1 x Magma 7 slot chassis-needs works fine but could use some tightening of the IEC receptacle on the PSU includes both host cards and ribbon cable. - \$200.00

1 x 13 slot Magma-includes 2 x host car

I'd like to buy the EDS 1000 with cable. Please contact me by email: joe@joejohnstonarts.com. Thanks.4 x ADAT modules (blackface)-\$200.00 each

1 x bundle consisting of MEC, C-16, IF2 and SCSI cable-\$150.00. Has all front and back plates.

1 x bundle consisting of MEC, C-16, IF2 and SCSI cable-\$125.00. The MEC has the rivets missing on the bottom of the chassis so the bottom plate is attached with black gaffer's tape. Has all front and back plates.

1 x MEC missing a number of front and back plates-Everything works fine except the IF2 port-\$50.00

1 x 13 slot Magma-includes 2 x host cards and ribbon cable-\$400.00

1 x set EDS connector cables (these are longer than the normal EDSX connectors)-\$35.00

2 x Midiman Digipatch units - \$225.00 each - currently on EBay

1 x Sony MU-R201 stereo Reverb - \$200.00-Currently on EBayColorgraphics Xentera AGP

Includes software, 4 connector cables and 4 DVI>VGA Adapters. I used this with my Cubase Sx rig. Never tried it with Paris. It worked very well on an ASUS A8V-Deluxe mobo. Drivers are Win XP only. No 64 bit upgrade available or planned.

These 4 head AGP cards are pretty rare these days and would probably rock like a big dog on a 4 x display Paris system running XP. It does take 2 x IRQ's but I had it sharing with one of my Pulsar cards with no problems on XP SP2 .NET v2.2

\$150.00 OBO.

DeejMatrox P750 AGP. This didn't play nice with my ASUS 88V-DLX on my Cubase rig. . It worked, but not as well as the NVidia card I subsequently used. Might be worth a try on your Paris rig. Win XP drivers only./ I do not know if there is a 64 bit upgrade planned for this card.

\$75.00I've been trying to figure out what to do with my Paris DAW. This has been an extremely stable platform for me for many years. It is an ASUS A7V8X mobo. I have been running Paris on this since I built it in 2003. It has 2 NVidia 5500 video cards running in the AGP and mobo slot 2. I was running 4 x EDS cards in slots 1, 3, 4 and 5. It is loaded with 1 G PC2700 Corsair XMS RAM. the CPU is an AMD XP 2800 and the system drive is running Win ME and has been tweaked to be able to access 1 G RAM (a tweak that Rick shwoed me). I just figure this mobo would probably do someone here more good running Paris than it would being an office machine. This system will run a good number of VST plugins. I have never maxed it out, though that was a few years back before I started using UAD-1's pretty much exclusively.

I'll sell the mobo, 2 x video cards, RAM and system drive for \$200.00. If you use this system drive in it's current configuration, you *will* have a stable Paris system running Win ME (so you can use multiple ADAT cards in multiple MECs) and you *will* be able to use 4 x monitors.

The system drive already has Paris 3.0 loaded on it and ready to go. I will throw in a Paris 3.0 OS CD and the Brian T video as well. the mobo will be shipped with the
