Do the MEC box's have any TRS ins?

Or is the 8 channel 'Analog In' you mentioned actually one of the TRS In modules that goes in the MECs being sold seperately? I need one 8 in, TRS Input and and the One C16. \$140 is about all I have. I'd like to have all the parts you have. But, I'm going to have to make some money with all the new stuff I've bought or fixed and be happy with 2.1

I have been trying to bring my studio as up to date as possible. But, I'm practically tapped out. Is the C16 in good condition? Do the MEC boxes each have the MEC Masters?

Thanks,  
Steve

Yes both mecs have the master sections with 4 trs ins and 4 trs outs and everything else. The 8in board is a piece on its own that goes into a mec to expand it. One Mec and the 8in board will get you 12 TRS inputs. Everything is like new.

C16 is in mint condition and always kept covered.

Thanks, then what I need is as you said; The 1 MEC box, the expansion board and C16. What is the least you will take for those 3 items? I'll borrow what I need to buy them because they are the highest on my priority list.

The next two week ends are going to be good money makers. So, I'll buy what ever is left.  
Steve
