Hey all, finally back, built a new computer, installed fios and finally got around to setting up my news account again. Been a while. I keep getting this error message after doing several cut and paste edits on a project. I can reopen the project and play it from the middle, but if I attempt to que it from the beginning the error message keeps popping up, forcing me to shut down paris. HELP, this project is for Othello Molineaux's new cd.
