For the other synth geeks like me, Spectrasonics announced their new =
synth - Omnisphere,
based on a new engine (STEAM - replacing the UVI engine that have used =
in Atmosphere, etc).

Sounds like it will be very cool based on the short teaser, but it's a =
ways off: Sept 15.

Euphonix:
Also word is PC support for the MC Control/Mix may be April. The =
Control should be shipping in March,
so not too far off.

Roland also bought a major share of Cakewalk.

Dedric

Saw that.. That one patch was "Epic". That's great news about The Euphonix
MC/Control..
