Once more with feeling...

Hi All -

I just picked up our band's new CD from the plant, and wanted to share a few tunes with you guys. Nothing's perfect, and you folks are a tough audience (listening to content \_and\_ production) but what the hey?

Tracked in PARIS, mixed in Logic/Paris, summed through a Modded Neotek to tape, Mastered with the Audio-Cube system.

Ted

Some of the tracks are here:  
[http://www.brilliantjoe.com/full\\_mp3s/](http://www.brilliantjoe.com/full_mp3s/)

The band's website is here:  
<http://www.brilliantjoe.com/index.html>

Ted, That's is really really nice. The tone is so analog sounding and really round and open. nicely done !

John

Ted, I couldn't get whole songs to download, my connection is sometimes weird about downloading mp3, but I thought the opening sounds and mix on "elevate" were were "WOW!" The woodiness and presence cut through.

Glad you like it. The difference between the mix "in the box"  
(Logic) and summing the stems out through the Neotek was  
startling. Without a doubt, anyone in the room heard it every  
time. Everything just got bigger, and opened up.

I know this topic has been discussed to death, but I'm still  
convinced that different DAWs affect the sound differently, even  
if only when Pan and Volume/Gain/Sum changes are made.

At this point in time, I'm thinking that Logic is not as "big"  
as CuBase/Nuendo. I also found different results when I took  
final mixes from Logic and dropped them into PARIS and rebounced  
in L & R with no gain change. I couldn't use this approach though  
and still supply tape to the Mastering guy...

Sorry you couldn't get more out of it. The website has a flash player under "Listen" that might give you a greater sampling.

yes there is a difference. i have both and have recorded to apogee ad16x, lynx arora through logic and it is smaller than recorded though paris and imported into logic. everything else aside paris is still has it's own magic.

The guy who did my mastering says that Nuendo does it for him, followed by Sonar. Logic and Pro Tools he positions further down the list. His list of credits is substantial...

I think he's the only guy in Canada to use the Audio-Cube system for Mastering  
<http://www.cube-tec.com/audiocube/index.html>
