Hi all,

Well, I got the room put back together. What a pain. But the rewards of getting rid of that desk are instant and tangible. The new patio table is way better, and since the speakers no longer have a desk top adding to their baffle, they sound terrific.

Here's a pic. (look close and you can see me posting this on the screen. odd thought...)

Everything sounds good now. Everything I play just sounds right. CD's tracks, roughs, everything. I spent a couple of hours with the analyzer today and got the sub really close.

It was all worth it. The desk is on ebay.

Got the first three tunes mixed again with the new setup. I'm pretty happy so far. I hope the client comes by tomorrow and hears this.

Paris still sounds absolutely stellar.

DC

Good to hear.

Looking at that photo of you making the post with the photo in it is like looking at one of those photos where you can see the photo you're looking at in the photo.

I see a familiar looking UPS on the floor... ;o)

Cheers,
Kim.

I am out of card slots, and there are no more G3 2-head cards, so I run everything at 1600 x 1024 and arrange things in a clever fashion... snork..

DC

How's your theater? Any good shows recently?

A MAC?? WHERE?? OMG, how did THAT get in here....

Shhh, there's another one on the table top. I think they're
reproducing...

I hate the single nonitor, but the solution if probably going to be
one BEEG monitor rather than 2.

I'm running an ATI 9200 card with DVI and VGA ports in my G4 system. The DVI
connects to a 20" Dell panel @ 1600 x 1200 and the VGA to a 17" Daewoo panel
@ 1280 x 1024.

I just got one of the 24" wide screens from Dell, 1920 x 1600 I think. It's pretty great, and I think I could fit two on my desk. Then again, that 30" dell or an Apple 30" would be quite nice.

I am limited to VGA output, so the Apple monitors won't work, and even if I use a convertor, there are no widescreen rezzes available in the G3..

Ideas? Can I get drivers that will work on OS9.2 and provide widescreen outputs?

Letsee.....I'd start with some super glue, a section of PVC pipe and an
old radiator core.....you will also need a crescent wrench....

Crescent wrenches are for PC's. Macs use a vise-grip and J-B Weld...

OK, I'll let you slide.

>DC
>
>How's your theater? Any good shows recently?

Theatre is good, and busy.

Last two concerts rocked - Cathy Richardson (www.crband.com) and Jim Peterik (www.jimpeterik.com)

Working on a blues festival with some real, honest-to-God Chicago blues artists, plus a couple of names I could never get if I didn't know someone who knew someone....

Next up, we install the subwoofer and re-tweak the system, and I have to modularized my stage snake to make it a bit more flexible.

pab
