Hi All,

Here's another build.

It turns out waiting for 20 milliseconds is a BAD idea. This version will try up to 1000 times to allocate the buffer before it gives up. Just a word of caution: it seems to me that the UAD plugins have issues with the few seconds after system startup, too. I get crashes if I try to load a project with UAD plugs while the start-up disk thrashing is still going on. PARIS loads fine, as do projects without UAD plugs during this time. Just wait 30 after start-up, and all is well.

I managed to get something that improves driver latency working! This will not mean anything right now, but it could mean everything once I get started on the ASIO driver. The driver will now use all available CPUs to speed up interrupt handling, and PARIS DPCs go to the front of the list. Sweet.

Instructions are now in the zip file.

Cheers!

Mike

Mike,

Do I need this version? I guess if you finally settle on a version I should

go with that, but with a rock-solid system right now, do I need to follow along? I am willing to help beta test if you need, as it's not any real trouble at all. I am at your service if needed.

Jimmy

Hi Jimmy,

I'm glad that it's working so well for you! I think the latest build (1.31) is safe, but if you've got work that just has to get done, stick with what's working.

Thanks again for testing out the code!

Mike
