Subject: Can't get the Compressor to work in XP
Posted by mikep[1] on Fri, 19 Oct 2007 20:22:40 GMT

I searched this, but found no answers.

How can I get the comp to work in xp?

Thanks,
Mike

Hi Mike,

Is it just my PARIS compressor that you can't get working? You could try adding the plugins directory to the windows path. Let me know if you need help with this.

All the best,

Mike

Yes it is.

I tried that, but it didn't seem to work.

Is there anythiing else I can try?

Thanks.

Hi Mike,

I'd double check that there isn't a typo in the path. You never know. send
me an email at mike AT mikeaudet dot com and I'll copy and paste the ini
file into a new document using visual studio and send it to see of that helps.
If that doesn;t do it, I'll make up a debug version, and you can email me
the log it creates.

Talk to you soon,

Mike

Have you tried this?

quotation marks). Make sure you have the semi colon between the new
entry and what was there before
..
I've got this from Mike and it helped me.

Erling
