Subject: Can ya help a brother out?
Posted by RK on Thu, 19 Jan 2006 17:54:41 GMT

1 card with MEC works great (98SE). Decided to complicate my life and add
another card and introduce my ol' 442 in the mix. What I want to do is use
card A for global effects (no limit, etc) and record to card B. Otherwords,
put the MEC on Card A and the 442 on card B (with inputs and outputs.) Or
the other way around (MEC on card A, 442 on B.)

I now have the MEC on card A (master), 442 on B, BNC out from MEC to in on
442. When it initializes, everything is cool, but I'm vapor locked on how
to record to the 442. In the patchbay, the MEC sucks up all the inputs and
the 442 will not patch across EDS cards.

How do I get the 442 inputs/outputs active so I can record? And don't
laugh, I know this is probably simple for the Paris intelligentsia.

Thanks,
Kent
