Opinions, please. And how much of a resource hog is it?

Thanks

No.. :) To me I like Wizoo's W2 much better. the Waves Ir1 has some the best  
Lexicon 480 samples I've heard. Then there's Voxengo's Convolution verb.(4  
stereo or 8 mono) nice !! Then there's TL space (Digi's) convo verb..Killer!!

Then my no#2 fav SIR.. To me Sir's colorless sound just works in all the  
DAWS.Nice and Rich..

Tha's not to say that Altiverb is not great, it is. But, there are other  
choices. :) Take care
