e. \$225 + shipping. If you will send me a blank front cover it will be \$210 + shipping. It is black and as far as I know works fine. I have no way to test it. Sorry. JimSold the DATPort.

C-16 is still available.

For dome reason, I wasn't able to send this to your comcast mail account, so I'll post it here:

Sorry, there is no 8 out card in the stuff I have for sale - I am selling 3 - 8 in cards. You must have mistaken my ad for John's.

Larry Upton
KPBS TV/FM
San Diego
Larry, does your Event EZ8 single ADAT I/O PCI card have adat sync?

There is no Paris Tutorial Video. I was in the pre production of a tutorial video when Paris was dumped by EMU. Aaron is working on something, but I think it's where BT left off.

JohnHi,
The cheapest online price for a pulsar II card with a synth pack can be find
on JRRSHOP for 800 \$.
Now add the VDAT (a Paris inside pulsar) this is an audio multitrack recorder
exactly like ADAT only up to 32 bits recording !! this sells for 249 \$ alone
Included B2003 best B3 emulation on planet another 249 \$ value
Plus a SPL attacker like designer only light version (no release) around
90 \$ value.
So all these if bought new would cost at today prices 800+500+90=1390 \$
I sell for 600 \$!!
if you ask why sell I have another two Pulsar II cards and bought an old
Pulsar I card just because it had The SONICTIMEWORKS bundle a bundle that
has CompressorX 4080L rverb Timeworks vintage eq and mastering.
So in order to have them work I have to have this pulsar I inside with other
Oulsar II cards.
Maximum is 3
