Nobody? I thought this was somewhat common?

Or not.

Sorry Tom, I assumed someone would reply, I got nothing for you except a vague recollection that this is a "hardware not found" thing. Sorry.

I had the same 1/1 problem sometimes when testing Mike Audet's new drivers with my quadprocessor. I believe Mike had about 20 different betadrivers before he nailed it.

My friend will be glad to know it guys.

That's what I thought but I wasn't sure if there was something
more specific. He gets that when booting up sometimes.

I think he's got some connection issues.

Thanks,

Tom

There were a *lot* of little gremlins running around in there. It took
Mike a long time to get them all singing the same song in the same key;
fortunately this seems to have been achieved :D
